

📁 KALI LINUX → ETHICAL HACKING ROADMAP

Clickable learning roadmap • Links verified against current official resources where applicable • Updated September 2026

PHASE 0 — Set up your learning environment

01. Kali official website	☐
02. Kali documentation	☐
03. Official Kali sites	☐
04. Download Kali	☐
05. Official VirtualBox image	☐
06. Install Kali in VirtualBox	☐ ☐
07. Import pre-built VM	☐ ☐
08. Guest additions / VirtualBox integration	☐

PHASE 1 — Learn Kali itself

09. Kali Training	☐ ☐
10. Kali Linux Revealed / Kali Training	☐
11. Kali tools directory	☐
12. Kali metapackages	☐
13. Official Kali videos	☐

PHASE 2 — Linux fundamentals

14. TryHackMe Pre Security	☐
15. Computer fundamentals	☐
16. Operating systems	☐
17. Linux CLI	☐
18. Linux basics	☐
19. Linux Fundamentals Part 1	☐
20. Linux Fundamentals Part 2	☐
21. Linux Fundamentals Part 3	☐

PHASE 3 — Command line

22. Linux shell	☐
23. Windows command line	☐
24. PowerShell	☐
25. OverTheWire Wargames	☐

PHASE 4 — Networking

26. What is networking?	☐
27. OSI model	☐
28. Packets and frames	☐

29. Networking Concepts	□
30. Networking Essentials	□
31. Networking Core Protocols	□
32. Networking Secure Protocols	□
33. Wireshark: The Basics	□
34. Tcpdump: The Basics	□
35. Nmap: The Basics	□
36. Wireshark documentation	□
37. Nmap documentation	□

PHASE 5 — Cybersecurity fundamentals

38. Offensive Security Introduction	□
39. Defensive Security Introduction	□
40. Cryptography basics	□
41. Public-key cryptography	□
42. Hashing	□
43. John the Ripper basics	□

PHASE 6 — Web fundamentals

44. How the Web Works	□
45. DNS in Detail	□
46. HTTP in Detail	□
47. How Websites Work	□

PHASE 7 — Web security

48. Getting Started	□ □ □
49. Learning Paths	□ □
50. Essential Skills	□ □ □
51. SQL Injection	□ □
52. Cross-Site Scripting	□ □
53. Authentication	□ □
54. Access Control	□ □
55. Path Traversal	□ □
56. OS Command Injection	□ □
57. SSRF	□ □
58. File Upload Vulnerabilities	□ □

PHASE 8 — Burp Suite

59. Burp Suite documentation	□
60. Burp Suite training	□ □ □
61. Burp video tutorials	□

PHASE 9 — Structured ethical-hacking practice

62. TryHackMe Cyber Security 101	□
63. TryHackMe learning roadmap	□
64. Jr Penetration Tester	□
65. Offensive Pentesting	□

PHASE 10 — Digital forensics

66. Autopsy	□ □
67. Autopsy documentation	□
68. Volatility Foundation	□ □

PHASE 11 — SOC / Blue Team

69. SOC Level 1	□
70. TryHackMe security analyst roadmap	□
71. Wazuh documentation	□ □
72. MITRE ATT&CK;	□
73. Splunk training	□ □

PHASE 12 — Final progression

74. Security analyst skills	□
75. Advanced Endpoint Investigations	□
76. Windows Incident Response & Forensics	□
77. SOC Level 2	□
78. More PortSwigger labs — all materials	□
79. All PortSwigger topics	□ □
80. PortSwigger advanced learning paths	□

□ What is free?

Resource	Free / Access	Account	PDF	Video	Labs
Kali Documentation	□	□	□	□ Some	□
Kali Training	□	□	□	□	□
Kali Revealed	□	Optional	□	□ Some	□
Kali VirtualBox	□	□	□	□	□
TryHackMe Pre Security	Free content + paid options	□	□	□ Some	□
TryHackMe Cyber Security 101	Free content + paid options	□	□	□ Some	□
TryHackMe Jr Pentester	Free content + paid options	□	□	□ Some	□
PortSwigger Academy	100% free	Account for progress	□	□	□
OverTheWire	□	Usually required to play	□	□	□
Wazuh	□	□	□	□	□
MITRE ATT&CK;	□	□	□	□ Some	□
Splunk Training	Some free	Usually account	□	□	□

□ Your exact path

KALI → Kali VirtualBox → Kali Linux Revealed → Linux Fundamentals → Command Line → Networking → Nmap → Wireshark → Cybersecurity Fundamentals → Web Fundamentals → Burp Suite → PortSwigger Labs → TryHackMe Cyber Security 101 → Jr Penetration Tester → Digital Forensics → SOC Level 1 → Wazuh → MITRE ATT&CK; → Advanced Labs

Safety: Do not start by attacking public websites, Wi-Fi networks, accounts, or other people's systems. Use your own VirtualBox machines and authorized training environments such as TryHackMe and PortSwigger Academy. PortSwigger describes its Academy as a safe and legal environment for practicing web security.

Source note: Several roadmap entries point to a current learning-path page rather than a single room because platforms periodically reorganize their curriculum. TryHackMe's 2026 roadmap currently lists Pre Security, Cyber Security 101, SOC Level 1, SOC Level 2, Advanced Endpoint Investigations, Windows Incident Response & Forensics, and Jr Penetration Tester. Kali identifies kali.org and its listed subdomains as official sources; PortSwigger's Academy provides free interactive labs and structured learning paths.
